Pre-employment requirement

- Drug test

Scope of work:

Redpath Black Diamond will be the primary contractor on an underground mine development project located in Matheson, Ontario. The planned development will consist of waste and ore development in the Smoke Zone and Middle Zone consisting of approximately 1590 meters of development of different sizes.

Job Summary:

Under the supervision of the Lead Miner and/or Shift Supervisor, the primary role of Miner is to inspect existing underground headings, scale loose rocks and install ground support to stabilize rock mass and ensure safety. The tasks may involve the operation of scaling bars, pneumatic hand-held drills, use of rubber-tired underground mobile equipment such as LHD (Load-Haul-Dump) units, mechanized bolters, scissor trucks, shotcrete sprayers and other support vehicles in a confined environment.

Duties and Responsibilities:

- Identify unsafe conditions in underground headings
- Drill holes using hand-held pneumatic drills or drill-boom mounted on bolter
- Insert rock bolt following approved method of installation
- Install other ground support components as required such as welded wire mesh and shotcrete
- Install or fix existing mine services such as vent tubing and pipes using various lifting equipment such as scissor trucks chain blocks and hand tools
- Follow directives from shift supervisors to coordinate day to day ground control requirements
- Assess all excavations and install ground support in development or reconditioned areas as per plan and section as the development progresses
- Keep track of all advances and communicate to supervisors and cross shifts footages and volumes
- Must be able to comprehend written and verbal instructions as required to perform his duties in a safe and efficient manner
- Must be able to follow proper procedure to ensure safety and to control equipment damage
- The duties and responsibilities listed above are representative of the nature and level of work assigned and are not necessarily all inclusive

Required Skills and Qualifications:

- **Ontario Hard Rock Underground Common Core – Full Basic (or other provincial equivalent) (required)**
- 3 years or more experience bolting with a jackleg and stoper
- Ability to multi task and work effectively
- Ability to work efficiently as part of a team as well as independently
- Good communication skills
- Having the authority and responsibility to maintain a safe and efficient working environment

- Following Company health and safety standards and reporting any unsafe acts or conditions to Supervisor
- Valid Ontario Mine Rescue is an asset

Health and Safety:

- Having the authority and responsibility to maintain a safe and efficient working environment
- Following Company health and safety standards and reporting any unsafe acts or conditions to Supervisor
- Responsible for the use and maintenance of all safety equipment, i.e. Lanyards, warning signs and labeling, according to company rules and applicable legislation.
- Responsible to ensure proper use and maintenance of personal protective equipment.
- Must have knowledge of the WHMIS legislation and know how to effectively use an MSDS sheet.
